

PRESS RELEASE

Innovation and Entrepreneurship Take Centre Stage at RESTLESS Startup Awards Final Conference

The Final conference marks the **conclusion of the RESTLESS project**, a two-year **Erasmus+ initiative** dedicated to equipping university students and graduates with entrepreneurial, digital, and green skills essential for the evolving health sector.

Hosted at the **Startup Center powered by Microsoft, European University Cyprus**, the conference will feature **10 HealthTech start-ups from Cyprus, Greece, Germany, Poland, and Portugal**, pitching their innovative solutions live. The most outstanding projects will be recognised through the **RESTLESS Startup Awards**, highlighting ideas that address real-world healthcare challenges and inspire transformative change.

Attendees will have the opportunity to connect with **healthcare professionals, entrepreneurs, educators, investors, and decision-makers**, exchange ideas, and expand their professional networks in an international and interdisciplinary setting. The evening will conclude with a networking cocktail reception celebrating collaboration and innovation within the European HealthTech community.

RESTLESS is an ambitious European initiative bridging the gap between higher education and the labour market in the health sector. Over 24 months, the project has developed a cutting-edge pedagogical framework and training programme tailored to students and graduates from **Medicine, Life Sciences, Engineering, Business, and Information and Communications Technology (ICT)**, which can be accessed through an online platform here: <https://www.restlessproject.eu/results/>. By fostering entrepreneurial thinking and supporting the digital and green transition in healthcare, RESTLESS prepares a workforce ready to meet the challenges of the future.

Through its training activities, health entrepreneurship bootcamps, and dissemination actions, RESTLESS promotes innovative solutions, shares best practice across Europe, and strengthens the ecosystem for health entrepreneurship education across the EU and beyond.
